

Backdoor Criterion: Identifying and Blocking Confounding Paths (Sepsis Domain)

(A) Original DAG: Confounding Paths

Dashed orange arrows = backdoor (confounding) paths

(B) After Conditioning on
 $Z = \{\text{SOFA, Age, Comorbidity, Inf. Source}\}$

Z blocks all backdoor paths (grey = conditioned)

(C) Numerical Demonstration
Naïve (9.8) vs. Adjusted (-16.2) pp
